

Epics og User stories

Task 1a Epic: Implement the design of the website

- As a user, I want to see a user friendly start page so I can get an idea what this company and website have to offer.
- As a user, I want a navigation bar, so that I can navigate between pages.
- As a user, I want a responsive navigation bar so that I have an easy time navigating the website on different devices.
- As a user, I want to see all offices so I can contact one that is nearby.
- As a user, I want to see the plumbers connected to an office so I know who will (potentially) be doing the job.
- As a user, I want the website to use semantic tags, so that it is more accessible.

Task 1b Epic: Make office list more interactive

- As a user, I want to filter the list of offices, so it is easier to find the office I am looking for.
- As a user, I want to change between a list view and a card view of the offices, so that I can personalize my view.

Task 2 Epic: Mini CMS for Articles

- As a user, I want to see a list of all the articles so I have an overlook over what to read.
- As a user, I want to be able to click on an article so that I can read its full content.
- As an admin, I want to be able to add new articles to the site so the user has something new to read.

Future use cases:

- As a user, I want to be able to search after an article so that I can easily find what I'm looking for.
- As a user, I want to be able to filter the list of articles so that I can view relevant articles for my needs.

Task 3: Epic: Create administrator

- As an admin, I want to write and publish articles, so they can be read by others.
- As an admin, I want to be able to create an account, so that I can be verified.
- As an admin, I want to be the only one who has access to edit articles, so that I have control over what is being published.
- As an admin, I want to set the author of the article, so that the reader can see who wrote it.

Task 4: Epic: Create UI for authenticated users

- As an admin, I want to be able to log in to my account, so that I can access my account.
- As an admin, I want to be able to log out of my account, so that I am no longer logged in when I am finished with my work.
- As an admin, I want the admin UI to be hidden for users who are not authenticated, so that regular users can't see them.

Task 5: Epic: Update the article view

- As a website owner, I want some articles to be hidden for unregistered users, so that more people create an account.
- As a user, I want to be able to create an account, so that I can view hidden articles.
- As a user, I want to be able to filter and search for articles, so that it is easier to find the articles I want to read.
- As a user, I want to be able to paginate the article list, so that the article page is more manageable.

Task 6: Make it possible to send inquiries - email service

- As a user, I want to be able to send inquiries so that I can contact the firm.
- As a logged in user, I want my name already filled out so that the inquiry can be sent faster.
- As a user, I want to get a confirmation email regarding the inquiry so that I know it was received.
- As an admin, I want to be sent a copy of the inquiry so that I have an overview of all inquiries.
- As an admin, I want to see all the inquiries at the site in case they disappear in my inbox.

Task 7: Add an image to an article

- As an admin, I want to give articles an image, so that they are more visually interesting.
- As an admin, I want to upload an image, so that I can add it to an article.

Task 8: Robust application

- As a user, I want to receive feedback when I try to submit a form, so that I know if it went successfully or not.
- As a developer, I want a high grade of test-coverage, so I can verify that the system meets its specified requirements.

Task 9: Track user behaviour

- As a company, I want to track user behaviour, so that I can market my products/services better.
 - Interesting user behavior:
 - How many views an article have
 - How many articles a user has read
 - The top 10 read articles
 - Average time spent on an article based on it's length
- As a company, I want to limit which admins that have access to user behavior, so that valuable customer information doesn't get leaked by lesser admins.
- As Super Admin I want to see the logged data on the site, so that I can easily see the information in one place.
